

[Online Sim \(hyperlink\)](#)

Tachometer lock recovery circuit automatically disables TACH_PI open drain/collector
if TACH_FAN has not been low for ~0.4s (i.e. fan slower than 38RPM)

If TACH_PI has not been pulled high for more
than ~0.7s then fan power MOSFET is disabled

- H1 MountingHole
- H2 JLCToolingHole
- H3 JLCToolingHole
- H4 JLCToolingHole
